

**LICENSE AGREEMENT
FOR NON-COMMERCIAL RESEARCH USE OF
IIIT-D MULTISPECTRAL PERIOULAR (IMP) DATABASE**

Introduction

The primary focus of the biometrics research we perform is to develop algorithms, techniques and tools for automatic recognition of humans. As a part of a research work, we are involved in forming this multispectral periocular database. The multispectral periocular database enables researches in developing, testing and publishing human recognition algorithms.

Consent

The researcher(s) agrees to the following conditions on the IIIT-D Multispectral Periocular (IMP) Database:

1. IIIT-D Multispectral Periocular Database is a valuable intellectual property.
2. The researcher(s) shall have no rights with respect to the Database or any portion thereof and shall not use the Database except as expressly set forth in this Agreement.
3. Subject to the terms and conditions of this agreement, the IIIT-D Multispectral Periocular is available for non-commercial research use only, a royalty-free, nonexclusive, non-transferable, license subject to the following conditions:
 - 3.1 The Database is only for the non-commercial research use and available to those direct research colleagues who belong to the same research institution and have adhered to the terms of this license.
 - 3.2 The Database will not be copied nor distributed in any form other than for backup.
 - 3.3 The Database will only be used for research purposes and will not be used nor included in commercial applications in any form.
 - 3.4 Any work made public, whatever the form, based directly or indirectly on any part of the Database will include the following reference:
 - A. Sharma, S. Verma, M. Vatsa and R. Singh, On Cross Spectral Periocular Recognition, *In Proceedings of International Conference on Image Processing*, 2014.

I hereby accept to adhere by the terms and conditions of this license agreement.
