

**LICENSE AGREEMENT  
FOR NON-COMMERCIAL RESEARCH USE OF  
IIIT-D PLASTIC SURGERY FACE DATABASE**

**Introduction**

The primary focus of the biometrics research we perform is to develop algorithms, techniques and tools for automatic recognition of humans. As a part of a research work, we are involved in forming this face database comprising pre- and post-surgery images. The face database enables researches in developing, testing and publishing human recognition algorithms. Image Analysis and Biometrics (IAB) Lab at Indraprastha Institute of Information Technology, Delhi (IIIT-D) holds the copyrights for the images collected and serves as the only source of distribution of IIIT-D Plastic Surgery Face Database.

**Consent**

The researcher(s) agrees to the following conditions on the IIIT-D Plastic Surgery Face Database:

1. IIIT-D Plastic Surgery Face Database is a valuable intellectual property.
2. The researcher(s) shall have no rights with respect to the Database or any portion thereof and shall not use the Database except as expressly set forth in this Agreement.
3. Subject to the terms and conditions of this agreement, the IIIT-D Plastic Surgery Face Database is available for non-commercial research use only, a royalty-free, nonexclusive, non-transferable, license subject to the following conditions:
  - 3.1 The Database is only for the non-commercial research use and available to those direct research colleagues who belong to the same research institution and have adhered to the terms of this license.
  - 3.2 The Database will not be copied nor distributed in any form other than for backup.
  - 3.3 The Database will only be used for research purposes and will not be used nor included in commercial applications in any form.
  - 3.4 This database consists of real world images collected from the internet. The plastic surgery face database is prepared with same spirit and understanding as the PubFig dataset and the Labeled Faces in the Wild (LFW) dataset. Therefore, we are sharing the direct link to the pre- and post-surgery face images. Researchers can use this database but are not encouraged to publish any images from the database due to privacy reasons. Copyright of these images are with the original creators.
  - 3.5 Any work made public, whatever the form, based directly or indirectly on any part of the Database will include the following reference: R. Singh, M. Vatsa, H.S. Bhatt, S. Bharadwaj, A. Noore and S.S. Nooreydzan, Plastic Surgery: A New Dimension to Face Recognition, *In IEEE Transaction on Information Forensics and Security*, Vol. 5, No. 3, pp. 441-448, 2010.

I hereby accept to adhere by the terms and conditions of this license agreement.
